Acknowledgements

First and foremost, I would like to thank my sister, Christina, for once again offering her editorial assistance. Her sustained enthusiasm and encouragement were essential during the last round of revisions, and her last-minute interventions greatly improved the readability of the final version. I would also like to thank my parents for always believing in me and supporting me in my endeavors, however far removed from the beaten path they may be. For my partner, Carl; for his respect for my work and commitment to providing me with a room of my own; and for his steady presence and loving embrace, I am forever grateful.

This project would not have been possible without the generous support from the Institut für Geschichte der Medizin der Robert Bosch Stiftung in Stuttgart, which provided me with a two-year postdoctoral research grant. Special thanks go out to Professor Dr. Robert Jütte and Professor Dr. Martin Dinges, for ensuring that I received support for this project before they transitioned into retirement; to Dr. Marion Baschin, for seamlessly and skillfully taking over the role of supervising my research; to Beate Schleh, for facilitating my search for archival material; and to Dorothea Schmucker, for organizing all logistical matters and providing comic relief during my visits to the institute.

This project was directly informed by the feedback I received during my doctoral thesis defence. I am grateful for the critical comments expressed by my examiners, especially Dr. Alice Kuzniar, who reminded me not to spare the history of homeopathy from the critical perspective that I otherwise apply to the history of medicine. I would also like to thank the third- and fourth-year students who attended the biopolitics course I offered at University College Freiburg (UCF) in 2018–2019, for providing insightful feedback on my early ruminations about applying the genealogical method to the history of medicine. An additional thank you goes out to Rebekka Deuse, Leonard Geisler, Nicolas Koch, and Rosa-Lena Lange, who went on to write thoughtful bachelors' theses under my supervision and so provided me with relevant material to read – and engaging interlocutors to discuss it with! – during a critical phase of my own writing process.

Finally, I would like to thank Molly Graham, to whom I dedicate this book, for introducing me to the world of homeopathy and isopathy, and for patiently and lovingly supporting me in finding my own stance in relation to the history of medicine.

Table of Contents

Introduction	1
Chapter One Stuck in the Trenches: Metaphors of War and Their Stronghold on Medicine	15
Chapter Two More than Words: Genealogy and Its Relevance in the History of Infectious Diseases	25
Chapter Three The Transformation of Knowledge and Its Political Implications.....	37
Chapter Four A Tale of Two Worlds: Homeopathy Meets Cholera.....	51
Chapter Five The Tension Mounts: Isopathy and the Question of Shifting Loyalties	65
Chapter Six The Reception of Homeopathy in England	77
6.1 Historical Context.....	79
6.2 Pasteurism, or “Homeopathy Gone Mad”	84
6.3 Koch’s Remedy: Apogee or Aberration?	92
6.4 Germs Abound but are Nowhere to be Found.....	101
6.5 Cholera, Commonsense, and Cleanliness.....	111
6.6 Summary.....	126
Chapter Seven The Reception of Bacteriology in Germany	129
7.1 Historical Context.....	132
7.2 Questions about Causation	136
7.3 Confronting Koch: The Same or Similar but Different?	145
7.4 Cholera Conflicts and Political Stakes.....	162
7.5 Summary.....	187
Conclusion	191
